# Total sales per music genre with sales higher than \$50

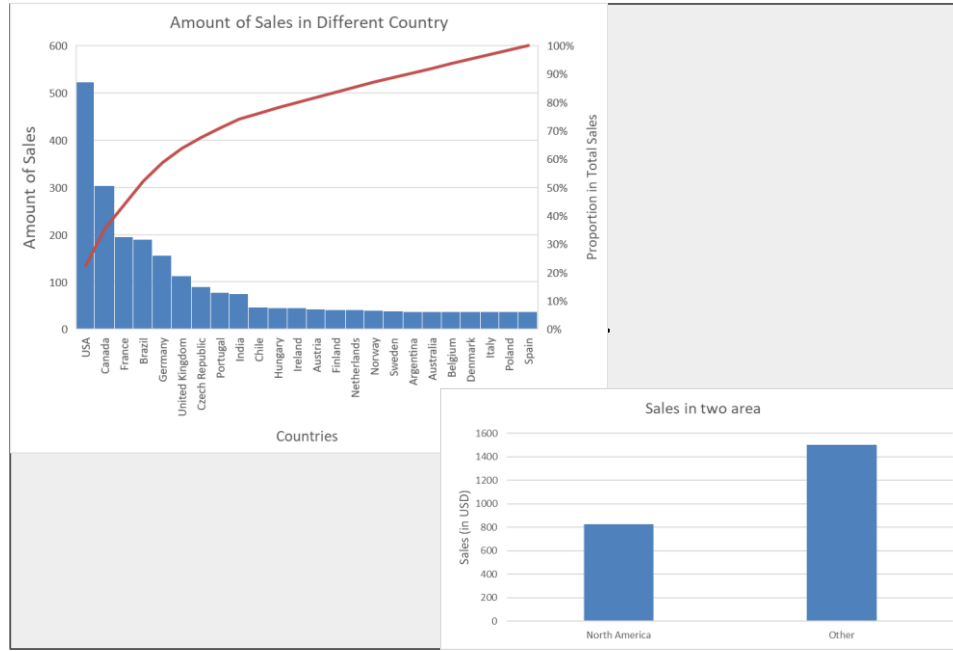

Among 25 different music genre(only count their media style is MPEG audio file) these 6 is most popular music type. Their sales are higher than \$50. From the chart we can see that Rock music the largest sales of any genre. Its sales is almost double of the second genre Latin. After Alternative & Punk, no other genre even close to the amount of the Rock.

# Top 5 artists with highest sales

The chart describes that the top 5 artists with the highest sales. The number one is Iron Maiden. The length of the quantity bar is almost the same as the length of the sales bar in the top 4 artists because their songs only sale for \$0.99/song compared to \$1.99 for Lost per song.

# The sales in two area: North America and Others

From the upper left chart, we can see that the USA and Canada are the two highest sales country, their sales are almost 40% of total sales. Other countries sales look very small compared to the USA and Canada (24 countries in total). But when we group them into two different area (North America including USA and Canada, others including all countries except USA and Canada.), the total sales of other area is almost double the sales of North America, just as the lower right chart shows.
