Figure1 : Malaria Deaths in Africa

From the above picture, we can see Kenya is the highest number of deaths among these Africa countries. Before 2010, it's the rate of death is almost 50 times higher than the average rate of deaths in Africa. But since 2011, it looks like the Malaria was destroyed in Kenya. Its rate of death decreased at half of the Africa average death rate. From this picture, we might think malaria was almost disappeared from 2011.
